GICS has obtained CIDB grading 4CE. Our Subsidiary Company Limpstaz Enviro Serv and Projects obtained 1CE, and 1EB CIDB Grading

Remarks

Gupson Consulting Ltd was established in 2016 as civil construction and environmental solutions entity but not limited to domestic and industrial waste management. We move +- 90 000 litres of waste water (sewer) per month and this alone guarantees our quality to our client, BPM.

Our company is currently doing supply at BOKONI PLATINUM MINE and OFFERING OTHER critical Services as per our scope herein. We are always striving to become masters of our craft and our commitment to quality products and exceptional services and incomparable customer care keep. The company was founded by PAUL M KUPA; Gupson is 100% black owned and a level 1 BBBEE company.

The founder of this entity was working in the mining Industry for decades and serving In the Human Resource Department for Anglo American, He later worked as Snr HR Officer – Employee Relations for an undisclosed mining JV company until 2017. In 2018 he was appointed as fixed term Legal Officer at one of South Africa's leading Labour movement in Pretoria until November 2020.

Since December 2015 he was involved and managed his construction businesses remotely as a Managing Director at Gupson Investment and Consulting Services Pty Ltd (GICS) and over the years it was a success story till Covid-19 hit hard the country in 2020. Paul M Graduated from the university of Johannesburg from a college of Law and he is currently studying at the University of Stellenbosch for 2022/24 academic years.

The founder has a clear understanding of managing clients and their business needs as he also majored in Business Law during his studies.

Gupson Consulting Ltd succeeded through a team of experienced engineers who are still part of the team with an objective to make this entity a success story.

Services

Mining

Supply of Underground (Support) Timbers

Why Choose GICS? oPassed experience in this similar project oOur team consists of experienced engineers and take environmental space as of importance oInnovative solutions to assist our clients

Environmental Solutions

Waste Management, Waste Water Treatment Plant Maintenance and Hazardous Waste Disposal Services

GICS Pty Ltd have environmental expert's individuals and engineers capable of providing comprehensive service to operate your wastewater treatment plant, we maintain your systems in regular intervals and also monitor their proper functioning. Our services are custom-tailored to your individual needs (domestic and industrial sewer plant) from general supervision to complete operating contract where we will treat your wastewater while you focus on your core business.

Operating Model Reduce Operating Costs

Employing well-engineered sewage plant technology enables wastewater treatment plant to achieve very low discharge value. Depending on the operating model we offer complete management of all waste water/sewage plant management systems and maintenance in order to reach an overall cost-reduction of your plant.

Fields of Application

- Regular Supervision
- Preventative Maintenance
- Regular maintenance and partial takeover of routine tasks
- For complete operating contracts; you focus on your product, we take care of your plant
- We also have a key responsibility to our clients on sludge disposal (use of a honey sucker truck) and a use of super sucker if its oil and contaminated water.
- Septic tank installation and sludge maintenance (tank litres be measured on usage total)
- When it comes to handling and dealing with disposing septic waste we are the right people for you, our heavy vehicles are readily available and there isn't a job too big.

24hours response - Honey Sucker 8000L and 14000L (Sludge Disposal) We have also completed few projects and have a truck available which also makes it easier to give our clients good prices and quality services. Recent project was valued at R265 000 (Two Hundred and sixty-five thousand rand) in April-May-June 2023, R162 000 in July-August 2023 and R149 000 in October-November 2022. we started collecting 40 000 liters of waste water at Bokoni Platinum mine since 2016 and between October 2022 & June 2023 we have collected or disposed sludge up to 495 000 liters. Most Project values are excluded by choice from the above and these figures determine our strength to deliver our services and meets timelines safely without compromising our environmental policy and that of a client. Our team rendered these services to Bokoni Platinum Mines since 2017 to date (2023)

Asbestos and Medical Waste Disposal Services

Plumbing Repairs and Maintenance (Our plumbers do maintenance for our limited clientele, eg Atokia Laerskool, Bokoni Platinum Mines, Atok ministry church and around the village)

- Installations of geysers
- Respond to blockages and spillage
- Repair and maintenance of all plumbing needs
- Management and repair of meter readings and or replacement of domestic pressure pumps.
- Installation and maintenance of water purification components and reverse osmosis

Environmental Audits

Perform environmental studies as per the clients need and provide detailed report annually, such reports are on a soft copy and HD disc. Demands and or service need are outlined by our clients, and we deliver as such and we wish you can put us on a test to offer our great service.

Environmental Management Systems, Plan and Monitoring

Environmental Impact Assessment and Offering project management services.

Oil and Water Separation Systems Management.

Hazardous waste and landfill management

If you have waste oil we will collect and dispose it, and supply you with all the relevant documentation, safe disposal certificates. Oil is regarded as hazardous and therefore we are at your service and our prices are competitive and we have a team of trained operators who know how to best handle hazardous waste even beyond oil. This also extends to removal of asbestos in any form. A waste plant for used oil is in Gauteng and that's where at Gupson we intend to dispose. Over the years we look forward to having accreditation by Environmental Affairs and with further certification by the Gauteng Provincial Government to Transport hazardous waste.

>Lastly, to register with Vlakfontein and Avendra facilities to dispose at their landfill site but our partners in this business specialty are accredited.

·TMM Workshop Surface Cleaning

- Oil and grease Spillage Cleaning
- Workshop Monthly cleaning using industrial machines
- Removal of hazardous wastes like drums containing oil and decreasing oil and etc
- Industrial Car Wash and all Trackless Machineries (Daily after shift and or weekly)

"At Gupson Investment Consulting Services Ltd we ensure cost effective methods when rendering our services to customers, are pricing is always a catch but that does not compromise the type of services we have always offered and that be in all types of treatment and disposal of all waste."

General Waste Collection (Rubble and Garden waste removal) Recycling Equipment.

We are eligible to remove any amount of rubble, be it tree filling or any other that includes domestic waste.

>Big site clearing is always recommended to use the following machinery which is on our disposal

1. TLB
2. Bobcat and tipper truck
3. Skid steer and few others which can also extend to physical labour

Skip Drop services from 2 cubes to 6 cubes

>6 Cube is recommended or is ideal if the area is busy, just so to avoid constant removal of waste, but our clients always can approve based on their needs.

Cleaning Services and Lawn Supply & Installation.

Cleaning as a general term, in our case it means cleaning of offices, change rooms, Gym and its equipments.

Anything that has to do with cleaning LESP is at your service.

Maintenance of a golf course green and cutting of grass as per the required standard.

Water the grass regularly and repair it after each game where golf clubs might have caused damage. Lawn supply is charged per square meter but lawn feeds will be supplied separately as well.
